Making your own resume – Challenge Block C 2024-2025

Whether you're applying for internships, graduation projects, networking, or just exploring your path, creating your Curiculum Vitae (CV) is an important start. This challenge is all about helping you create a CV that reflects your strengths and passion, even at the start of your career.

Requirements

To get the 1 point for this challenge, you need to adhere to these two requirements:

1. Complete a LinkedIn Learning course (2,5 hours), and upload the certificate to Brightspace.

https://www.linkedin.com/learning/writing-a-resume/writing-a-successful-resume?u=36359204

2. Upload your CV to Brightspace

Feedback

Your assigned mentor (see Feedback-Resume-Challenge.pdf) will give you one round of feedback, likely during Block D. Contact them directly on Teams. You can submit an earlier draft on Brightspace if you want to get the point sooner.

Resources

Below you will find a list with interesting resources for creating your resume:

Putting GitHub projects on a resume *(*NB: Always check whether you are allowed to publicly share your work, especially if you did it for a client!)
